**RE-ADVERT: UPGRADE AND EXTENSION OF BOSPOORT WATER TREATMENT
WORKS – MECHANICAL AND ELECTRICAL WORKS**

C2.1 PRICING INSTRUCTIONS

C2.1 PRICING INSTRUCTIONS

1. General

1.1 This section provides the tenderer with guidelines and requirements with regard to the completion of the Bill of Quantities. The Schedule has to be completed in black ink and the tenderer is referred to the Tender Specifications in regard to the correction of errors.

1.2 The Bill of Quantities shall be read with all the documents which form part of this Contract.

1.3 The following words shall have the meanings hereby assigned to them:

- Unit: The unit of measurement for each item of work in terms of the Specifications and the Project Specifications.
- Quantity: The number of units of work for each item.
- Rate: The payment per unit of work at which the tenderer tenders to do the work.
- Amount: The product of the quantity and the rate tendered for an item.
- Lump sum: An amount tendered for an item, the extent of which is described in the Bill of Quantities, the Specifications and the Project Specifications, but the quantity of work of which is not measured in any units.

1.4 Reference shall be made to the General and Special Conditions of Contract regarding Provisional and Prime Costs Sums.

1.5 The contractor shall determine the contract skills participation goals, expressed in Rand, which shall not be less than the sub-total multiplied by a percentage factor given in Table 2 in the Standard for the applicable class of construction works. This is indicated by the percentage factor in the Final Tender Summary section. Minimum Contract Skills Development Goal (CSDG) sum = Electrical Engineering(Infrastructure) EP and Mechanical Engineering (Infrastructure) ME of (0.25%) x Subtotal of the tender amount.

2. PRICING OF MECHANICAL AND ELECTRICAL WORKS

The prices quoted for the supply of plant and equipment shall include for all handling, loading, transporting and off-loading required for the delivery of the plant and equipment to the site, including in the case of off-site storage for double handling at the store.

The prices quoted for erection and/or installation shall include for all handling, loading, transporting and off-loading to take plant and equipment to place on site where required, erection, installation, painting, guaranteeing for a period of twelve (12) months and upholding for a period of twelve (12) months, all as specified.

The prices quoted for the commissioning of plant shall include for operating, mechanical and electrical testing, adjusting and handing over in a proper working order and for the provision of operating and maintenance manuals, all as specified.

<div data-bbox="159 2024 331 2096" style="border: 1px solid black; width: 100px; height: 30px;"></div> <p>Contractor</p>	<div data-bbox="387 2024 563 2096" style="border: 1px solid black; width: 100px; height: 30px;"></div> <p>Witness 1</p>	<div data-bbox="619 2024 794 2096" style="border: 1px solid black; width: 100px; height: 30px;"></div> <p>Witness 2</p>	<div data-bbox="850 2024 1026 2096" style="border: 1px solid black; width: 100px; height: 30px;"></div> <p>Employer</p>	<div data-bbox="1082 2024 1241 2096" style="border: 1px solid black; width: 100px; height: 30px;"></div> <p>Witness 1</p>	<div data-bbox="1313 2024 1473 2096" style="border: 1px solid black; width: 100px; height: 30px;"></div> <p>Witness 2</p>
--	---	---	---	---	---

02_Vol1B_ME_June25Part C2

June 2025

Any additional charges in connection with off-site storage which there may be over and above the prices quoted in the various sections of this Bill of prices, shall be set-out in detail by the Tenderer.

Amounts allowed for provisional sums and contingencies will be spent in part or as a whole at the sole discretion of the Engineer.

2. PAY ITEMS

For preliminary and general charges, the method of measurement and payment shall be as specified in Particular Specification PPG of the contract documents. Measurement and payment of mechanical and electrical equipment shall be as described in the Particular Specification, as amended, or as described in the Bill of Quantities.

Descriptions in the Bill of Quantities are abbreviated and comply generally with those in the Standard Specifications. The measurement and payment clause of each Standard Specification, read together with the relevant variations and amendments to the Standard Specification, set out what ancillary or associated activities must be included in the rates for the operations specified. Should any requirements of the measurement and payment clause of the applicable Standard Specification, or the variation thereof, conflict with the terms of the Bill of Quantities, the requirements of the Standard Specification or variation thereof, as applicable, shall prevail.

The units of measurement described in the Bill of Quantities are metric units. Abbreviations used in the Bill of Quantities are as follows:

mm	=	millimetre	h	=	hour
m	=	metre	kg	=	kilogram
km	=	kilometre	t	=	ton (1000kg)
m ²	=	square metre	no.	=	number
m ² .pass	=	square metre pass	sum	=	lump sum
ha	=	hectare	MN	=	meganewton
m ³	=	cubic metre	MN.m	=	meganewton-metre
m ³ .km	=	cubic metre-kilometre	PC sum	=	Prime Cost sum
l	=	litre	Prov sum	=	Provisional sum
kl	=	kilolitre	%	=	Percent
MPa	=	megaspascal	kW	=	kilowatt

4. RATES

- 4.1 The prices and rates to be inserted in the Bill of Quantities are to be full inclusive prices for the work described under the several items. Such prices and rates shall cover all costs and expenses that may be required in and for the execution of the work described, and shall cover the cost of all general risks, liabilities, and obligations set forth or implied in the documents on which the tender is based, as well as overhead charges and profit. Reasonable prices shall be inserted as these will be used as a basis for assessment of payment for additional work that may have to be carried out.
- 4.2 A price or rate is to be entered against each item in the Bill of Quantities, whether the quantities are stated or not. An item against which no price is entered or where a word or phrase such as “included” or

Contractor	Witness 1	Witness 2	Employer	Witness 1	Witness 2

02_Vol1B_ME_June25Part C2

June 2025

“provided elsewhere” will be accepted as a rate of nil (R0,00) having been entered against such items and covered by the other prices or rates in the schedule.

Any work executed to which such a pay item applies, shall be measured under the appropriate items in the Bill of Quantities and valued at a rate of nil (R0,00). The rate of nil shall be valid irrespective of any change in the quantities during the execution of the Contract.

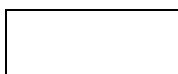

- 4.3 The Tenderer shall fill in a rate against all items where the words “rate only” appears in the amount column. The intention is that, although no work is foreseen under such item and no quantities are consequently given in the quantity column, the tendered rate shall apply should work under this item be actually required.
- 4.4 Except where rates only are required, the Tenderer shall insert all amounts to be included in his total tendered price in the “Amount” column and show the corresponding total tendered price.
- 4.5 All rates and sums of money quoted in the Bill of Quantities shall be in rands and whole cents. Fractions of a cent shall be discarded.
- 4.6 All prices and rates entered in the Bill of Quantities must be **excluding** Value Added Tax (VAT). VAT will be added last on the summary page of the Bill of Quantities.
- 4.7 Should excessively high unit prices be tendered, such prices may be of sufficient importance to warrant rejection of a tender by the Employer.
- 4.8 Where the Contractor is required to furnish detailed drawings and designs or other information in terms of the Contract Documents, all costs thereof shall be deemed to have been provided for and included in the unit rates and sum amounts tendered for the items scheduled in the Bill of Quantities, and separate additional payments will not be made.
- 4.9 For items in the bill of quantities where rates include the disposal of recyclable materials, the rebate for the value of the recyclable materials are to be included in the rate provided.

CORRECTION OF ENTRIES MADE BY TENDERER

Any entry made by the Tenderer in the Bill of Quantities, forms, etc, which the tenderer desires to change, shall not be erased or painted out. A line shall be drawn through the incorrect entry and the correct entry shall be written above in black ink and the full signature of the Tenderer shall be placed next to the correction.

E6	EPLC	<u>SCHEDULE NO. E6</u> <u>PROGRAMMABLE & LOGIC CONTROLLERS</u>					
E6.1	EPLC	<u>SCHEDULE E6.1 - DESIGN, DRAWINGS AND GENERAL</u>					
	26.1						
	EPLC 26.1 (a)	The Contractor will provide the following design calculations, Drawings and wiring diagrams for approval by the Engineer: a) Fibre loss design calculations in excel format which will include but limited to From, To, Distance losses and Tag numbers and total losses through the fibre network [fibre losses] b) Electrical Load lists in excel format of all PLC equipment c) Engineer design drawings of network layout which contains all IP addresses, equipment and drawings d) Report which will include antennae radio paths, drawings which have line of sight of all locations in AutoCad Format, Connection speeds with the radio or wireless communication, details of all Radio & Wireless Radio losses e) Input and Output schedules in excel format which contains all tag numbers, names, commands, and description of all I/O f) Loop diagrams in AutoCAD format g) Cable schedules in excel format which will include but limited to From, To, Distance and Tag numbers h) AutoCAD drawing of all equipment positions, equipment layouts, cable layouts, rack layouts, router / modems, switches connections and layouts. i) P&ID drawings of the entire system which is implemented and equipment in AutoCAD format which shall strictly accordance to ANSI/ISA-5.1 [American national Standard] j) Functional design specification which will include but not limited to all mimic diagrams, control procedures compared to control philosophy and a detail description how the PLC will control the entire system [broken down into each component]. (Refer to particular specifications)					
E6.1.1			G	Sum	-		
E6.1.2	EPLC 26.1 (b)	Provide operating all maintenance manuals and "as-built" drawings as specified (refer to particular specification EPLC)	G	Sum	-

Upgrade and Extension of the Bospoort Water Treatment Works to 24 Mℓ/d

Civil, Mechanical & Electrical combined

Summary of Schedules

Schedule No.		Description	Amount (R)
1	MECHANICAL	PRELIMINARY AND GENERAL	
2		PROVINSIONAL SUMS, ADDITIONAL WORK & DAYWORKS	
3		STEEL, PIPE FITTINGS AND VALVES	
4		STEEL AND METALWORK	
5		DISSOLVED AIR FLOTATION (DAF)	
6		RGS FILTRATION SYSTEM	
7		OZONE EQUIPMENT	
8		GAC FILTRATION SYSTEM	
9		GAC MEDIA	
10		PUMPS	
11		DEWATERING EQUIPMENT	
12		CHEMICAL DOSING	
13		HOISTING EQUIPMENT	
E1	ELECTRICAL	MEDIUM VOLTAGE SWITCHGEAR	
E2		RING MAIN UNITS	
E3		POWER TRANSFORMERS	
E4		MINIATURE SUBSTATIONS	
E5		MOTOR CONTROL CENTRES AND DISTRIBUTION BOARDS	
E6		PROGRAMMABLE LOGIC CONTROLLERS	
E7		SCADA SYSTEMS	
E8		CONTROL AND INSTRUMENTATION SYSTEM	
E9		GENERAL AND MISCELLANEOUS	
E10		TELEMETRY SYSTEM	
E11		EARTHING AND LIGHTNING PROTECTION	
E12		SMALL POWER AND LIGHTING INSTALLATIONS	
E13	CIVIL	MULTICORE CABLES AND EARTH WIRES	
E14		SITE LIGHTING	
E15		STANDBY GENERATOR SYSTEM	
C3		EARTHWORKS AND PIPELINES	
C4		CONCRETE (STRUCTURAL)	
C5		ACCESS, PAVING, DRAINAGE AND FENCING	
C6		BUILDING WORK	
C7		STRUCTURAL STEELWORK (SMALL WORKS)	
C8		STEEL, PIPE FITTINGS AND VALVES	
Sub-Total A			
Minimum Contract Skills Development Goal Sum = EP&ME (0,25%) × Sub-Total A [In accordance with the Standard for Developing Skills through Infrastructre Contract]			
Sub-Total B			
Provisional sum: Allowance for Contingencies (10% of Sub-Total B)			
Sub-Total C			
Provisional sum: Allowance for Contract Price Adjustment (10% of Sub-Total C)			
Total Construction Cost			
Value Added Tax at 15%			
Total Amount of Tender Carried Forward to Form of Bid

VARIABLE FREQUENCY DRIVES : <100kW				
Item no.	Description	Units	Specified	Offered
5 CONVERTER TRANSFORMER				N/A
5.1	Type (oil-filled or dry)			
5.2	Number of secondary windings			
5.3	Primary rated voltage	V		
5.4	Secondary rated voltage	V		
5.5	Rated power	kVA		
5.6	Free-standing (FS) or integral (I) to VFC	FS/I		
5.7	No-load losses	W		
5.8	Load losses	W		
6 CONVERTER CONFIGURATION				
6.1	Form of converter (package/chassis/cabinet unit)		Package	
6.2	Rectifier type: diode- or active front end (DFE/AFE)		DFE	
6.3	Rectifier pulse number		12	
6.4	Bypass/redundancy arrangement specified	Yes/No	No	
6.5	Input air circuit-breaker	Yes/No	No	
6.6	Input switch-disconnector	Yes/No	No	
6.7	Input semi-conductor fuses	Yes/No	Yes	
6.8	Input contactor	Yes/No	Yes	
6.9	Input earthing switch	Yes/No	No	
7 CONVERTER FILTERS				
7.1	Line-side reactor	Yes/No	Yes for >20kW	
7.2	Line-side reactor relative short-circuit voltage	%		
7.3	Line harmonic filters (LHF)	Yes/No	Yes	
7.4	LHF free-standing (FS) or integral to VFC (I)	FS/I		
7.5	Motor-side reactor	Yes/No	Yes	
7.6	Motor-side dv/dt filter	Yes/No	Yes

IMPORTANT NOTE:

Refer to the Particular Specifications

No.	Item	Technical Particulars
1. RESILIENT SEAL GATE VALVE		
1.1	General Data	
1.1.1	Country of origin	
1.1.2	Manufacturer (name & country)	
1.1.3	Supplier	
1.1.4	Product name	
1.2	Materials	
1.2.1	Valve body	
1.2.2	Spindle	
1.2.3	Disc	
1.2.4	Valve seat	
2. WEDGE GATE VALVE		
2.1	General data	
2.1.1	Country of origin	
2.1.2	Manufacturer (name & country)	
2.1.3	Supplier	
2.1.4	Product name	
2.2	Materials	
2.2.1	Valve body	
2.2.2	Spindle	
2.2.3	Disc	
2.2.4	Valve seat	
3. BUTTERFLY VALVES		
3.1	General Data	
3.1.1	Country of origin	
3.1.2	Manufacturer (name & country)
